ABOUT ME

I have 3 months of experience in Android Development through the Bangkit Academy. During this program, I focused on mastering Kotlin, OOP, and applied my skills in a capstone project centered on Android application development. My expertise includes implementing modern features, optimizing code, and building applications that meet industry standards.

EDUCATION

Oct 2022 - Present

UNIVERSITY INDRAPRASTA PGRI | INFORMATICS ENGINEERING

Currently pursuing a degree and am in my sixth semester.

Sep - Dec 2024

BANGKIT ACADEMY 2024 BY GOOGLE, GOTO, TOKOPEDIA, TRAVELOKA - ANDROID LEARNING PATH

Participated in a four-month intensive training program focused on Android application development using Kotlin. Gained in-depth knowledge of Android development, UI/UX, Clean Architecture, Jetpack Components, and best practices in app development. Worked in a cross-disciplinary team (Machine Learning, Cloud Computing) to develop a capstone project based on technology-driven solutions.

WORK EXPERIENCE

Oct - Dec 2024

CAPSTONE PROJECT KIDCARE | BANGKIT ACADEMY 2024 BATCH 2

I participated in the Capstone Project KidCare as part of Bangkit Academy 2024 Batch 2, where my team and I developed an Android application using Kotlin Jetpack. This application aims to help prevent stunting in children by integrating Cloud Computing and Machine Learning with TensorFlow.
In this project, I contributed to the development of various features, including a stunting prediction system, user data management, educational articles, as well as authentication and cloud data storage. The implemented Machine Learning model enables the app to provide data-driven recommendations to help parents monitor their child's growth.

SKILLS

- Android Studio
- Visual Studio Code
- OOP
- Problem-Solving
- Firebase
- Front End
- Kotlin
- Jetpack Compose
- MVVM
